AppVentory

AI SPEND MANAGEMENT

Your AI costs are unpredictable. Your budget shouldn't be

AppVentory brings all your OpenAI and Claude spend into one place, with every detail you need to review it — then helps you control it and forecast where it's heading.

1 view
All your AI spend, centralized

No changes
To how your team uses AI

0 blind spots
Across every AI provider you use

What you get

Forecast

Know where the month will land before the bill does. Budget next quarter on real usage, not guesswork

Centralize

All your AI spend in one view, across every provider. See what's driving cost by team, project and person

Control

Every account has a named owner and a clear status. Set monthly limits, with alerts at the thresholds you choose

HOW IT WORKS

One connection. A clear forecast

Connect Link your AI provider accounts

See Spend syncs automatically, in near real time

Control See month-end spend before the bill lands

SECURE & OUT OF YOUR WAY

Never touches your sensitive data

Never sees your prompts
Billing data only. Your prompts and responses stay private

SOC 2 certified
Independently audited security

Never blocks your team
Alerts, not shutdowns. Work carries on

Keeps your history
Past spend stays, even after an account is removed

For Finance and Leadership

One AI bill. Finally explained

- ✓ Finance can explain, budget & forecast the AI line item
- ✓ Leadership sees what AI costs, and where it pays off
- ✓ Every account has a named owner. No orphaned spend

Integrations

Works with the AI you already use

APIs, seats and subscriptions, in one place

& more
